

“WE TRAVEL” HOLIDAYS

Name:Nandhini B(TR10436)

Team Member:Preethi S (TR10444)

Abstract:

The Holidays Package Booking is a web-based application that aims to provide a simple and user-friendly experience for travelers who are looking to plan their vacations efficiently. The Technologies used in this project includes Angular for the front-end, .NET Web API for the back-end, and SQL Server Management Studio as the database. The users can view various packages and can book the package provided based on their preferences.

Module:

- Login - User , Admin
- Register - User
- Package search and Listing Module
- Package Details Module
- Package Booking Module
- Admin Panel Module

API Endpoint:**Home :**

- 1)Login
- 2)Register

Package Search:

- 1)Search
- 2)Payment Calculate
- 3)Checkout

Admin page:

- 1)Create package
- 2)Edit
- 3)Delete

My packages:

- 1)Display Package details
